

Old Video being circulated in the context of Coronavirus

Be cautious of video shared out of context on Covid19

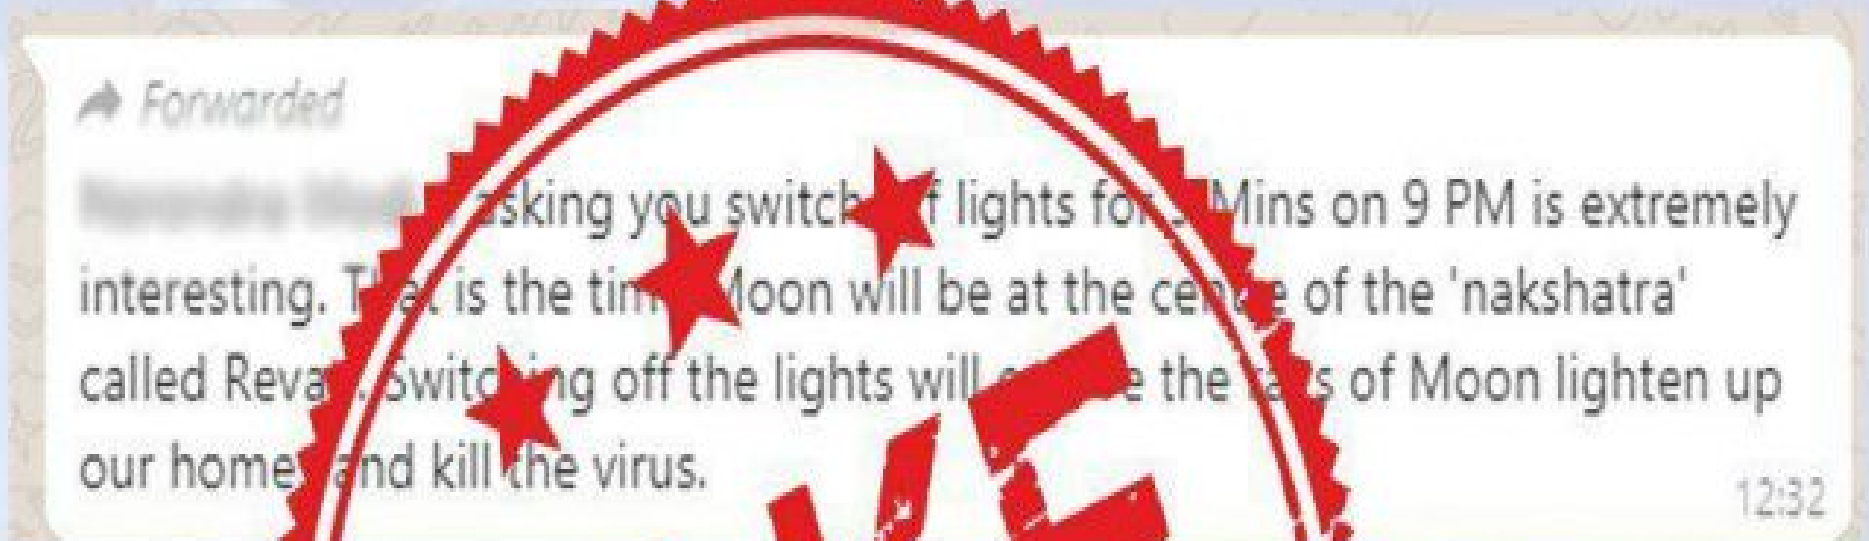

#PIBFactCheck

Please don't believe rumours & unscientific forwards.

Let's stand together in the fight against COVID19

Corona viruses don't survive at high temperature, as per research by NASA.

If 130 candles are lit together, temperature will increase by 9 degrees - as per IIT professor.

So Corona will die at 9:09pm on Sunday.

Masterstroke by Modi.

1 Candle gives 2 Kcal heat energy,
1 Flash, Mobile gives 0.5 Kcal heat energy,
1 Oil lamp gives 3 Kcal heat energy,
Means if request followed by 70 Crore people (out of 130 Crore) then
35 cr candle + 20 cr mobile flash + 15 cr oil lamp = 125 cr kcal heat energy will be generated.
Corona Virus will become dead in 10 Kcal heat energy
Hence all corona virus will become dead on 5 April at night .

NO! A simple cup of tea cannot cure Coronavirus

FAKE

that were so difficult for people in China to understand is actually called **Tea** in India, YES, our regular tea has all these chemicals already in it. The main Methylxanthine in tea is the stimulant caffeine. Other Methylxanthines found in tea are two chemically similar compounds, Theobromine and Theophylline. The tea plant creates these chemicals as a way to ward off insects and other animals. Who would have known that all the solution to these virus would be a simple cup of TEA, and that is the reason so many patients in China are being cured. The hospital staff in china has started serving tea to the patients 3 times a day, And the effect is finally in **Wuhan** "The centre of this Pandemic" has been contained and community transmission has almost stopped.

Please Share this message to your friends and family to make them aware about this blessing in the form of TEA in your kitchen.

Audio clip claiming to be a conversation between two individuals mentioning “**complete lockdown**” of the country is going viral on the **social media**

The audio clip is **Totally Fake!**

There is NO SUCH PLAN!

NO! Drinking water does not prevent Coronavirus infection.

SERIOUS EXCELLENT ADVICE by Japanese doctors treating COVID-19 cases. Everyone should ensure your mouth & throat is moist, never DRY. Take a few sips of water every 15 mins at least. WHY? Even if the virus gets into your mouth...drinking water or other liquids will WASH the virus down through your oesophagus and into the stomach. Once there in tummy...your stomach ACID will kill all the virus. If you don't drink enough water more regularly, the virus can enter your windpipes and into the LUNGS. That's very dangerous.

Pls send and share with family, friends and everyone about this ! Take care everyone n may the world recover from corona virus soon. May all be well n happy.

NO! such order has NOT been issued by Govt. of India

PRESS RELEASE

NATIONAL SECURITY COUNCIL, PRIME MINISTER'S OFFICE

18 MARCH 2020

1. As you are aware, the Government has declared Movement Order from 18 to 31 March 2020.
2. Following the declaration, follow up steps have been taken to coordinate and detail out the implementation of the Order. The National Security Council had a coordination meeting between government agencies on 18 March 2020 to ensure the smooth implementation of the Order. To ensure that the needs of the people are not affected during the restricted period, certain services listed in Attachment A (Essential) and Attachment B (Non-Essential) are allowed.
3. The Order will be effective from 12 midnight, 18 March 2020. The public is required to obey all regulations issued by the authorities.
4. To implement the Restricted Movement Order, the Prevention and Control of Infectious Diseases (Prevention, Within the Infected Local Areas) Regulations 2020 was gazetted on 18 March 2020. PDRM and RELA have been appointed as the authorized persons under Section 144 of the Prevention and Control of Infectious Diseases Act.
5. To ensure the effectiveness of the Order, the general public is advised to stay home at all times except to fulfill basic needs. Apart from that, please practice social distancing to prevent being infected by COVID-19.
6. If there are any further questions, please contact the National Operations Administration Centre, National Security Council at 03-8888 2010.

Thank you!

Drinking and gargling with warm water mixed with vinegar and salt **CAN NOT** help ward off Coronavirus

Corona virus before it reaches the lungs it remains in the throat for four days and at this time the person begins to cough and have throat pains. If he drinks water a lot and gargling with warm water & salt or vinegar eliminates the virus. Spread this information because you can save someone with this information

FAKE

NO ! Coronavirus CANNOT be transmitted through Mosquito Bites.

No! Drinking alcohol doesn't protect you from Coronavirus infection.

CLAIM

A look at the coronavirus .

Don't eat cold foods for any reason .. Avoid
stuff like ice cream!

REALITY

**Coronavirus does not spread
through the consumption of ice
creams**

To check if any central Govt. related Policy/Scheme/News is Fact or not -

This advisory has **NOT** been issued by **UNICEF**

Forwarded

Unicef

Corona virus is large in size where the cell diameter is 400-500 micro and for this reason **any mask prevents its entry**

The virus does not settle in the air but is grounded, so it is **not transmitted by air.**

Coronavirus when it falls on a metal surface, it will live 12 hours, so **washing hands with soap** and water well enough.

Corona virus when it falls on the fabric remains 9 hours, so **washing clothes or being exposed to the sun for two hours** meets the purpose of killing it.

The virus lives on the hands for 10 minutes, so putting an **alcohol sanitizer** in the pocket meets the purpose of prevention.

If the virus is exposed to a temperature of 26-27 °C it will be killed, as viruses not live in hot regions. Also **drinking hot water and sun exposure** will be a trick

And **stay away from ice cream and eating cold** is important.

Gargle with warm and salt water kills the tonsils' germs and prevents them from leaking into the lungs.

Adherence to these instructions fulfills the purpose of preventing virus.
